# ONESTEP EDGE CLOUD

STREAMLINE THE DEVELOPMENT OF SELF-SERVICE CLOUD BUSINESS

BUILD PUBLIC, PRIVATE OR HYBRID CLOUD UNDER YOUR OWN BRAND

One Step Edge Cloud is a software that quickly builds enterprise grade, scalable self-service cloud.

LEVERAGE YOUR INFRASTRUCTURE TO MEET THE DEMAND FOR DEPLOYING:

- Easy to use and quick-to-implement solution
- Cost effective ways to handle high-performance, specialized workloads
- Deploying **EDGE** and **FOG** cloud infrastructure
- Operational efficiency of applications and processes

INTEGRATED TECHNOLOGY

DELLTechnologies

Dell Technologies
infrastructure
#1 global
cloud infrastructure provider

vmware

VMware – based cloud
#1 most widely used
virtualization platform

WITH SOFTWARE-DEFINED CLOUD, YOUR CUSTOMERS GET:

- Virtual data centers, to scale as needed
- Multiple points of presence
- Flexible resource management
- Self-service dedicated and virtual servers integration
- Marketplace of VMs with pre-installed software and AI accelerators
- Access to dedicated, specialized hardware – GPU, FPGA, AI accelerators
- VPN access to the VDC
- Cloud API for scripting and automation

managed by:

- Self-service portal
- Centralized orchestration
- Single-pane-of-glass UI
- Consumption-based billing

LOW RISK, HIGH-YIELD BUSINESS OPPORTUNITY

New revenue source with fast time-to-market

**Low barriers to entry and flexible financing**

Price transparency and linear billing model (license-based)

HOW ONE STEP EDGE CLOUD WORKS

One Step Edge Cloud allows you to turn infrastructure virtualized with VMware into complete and marketable cloud solution by adding automated management and orchestration layer.
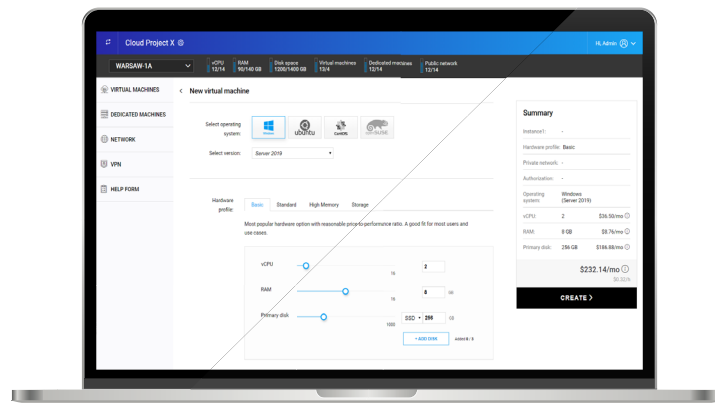

SINGLE SERVER BECOMES EDGE DATA CENTER

- With One Step Edge Cloud you are able to push processing away from centralized cloud servers and closer to the edge where data is created.

- A single server is enough to deploy One Step Edge Cloud in any location and process the bulk of data there, reducing overall transfer cost.

CUSTOMIZABLE CLIENT INTERFACE

- Ready for your brand

- Intuitive to use for non-technical users

- Integrated billing and payment system
